

# HUSSEIN RAJAB

## FULL-STACK/ WEB DEVELOPER | INFORMATICS ENGINEERING STUDENT

+963.950.052.045 | husen\_rajb@outlook.com | www.github.com/frbhusen

### PROFESSIONAL SUMMARY

Full-stack developer and informatics engineering student with hands-on experience building real-world web platforms from scratch. Skilled in frontend, backend, and database development, with strong problem-solving and system design abilities. Experienced in educational platforms, e-commerce systems, and automation tools. Proven ability to work independently, manage full projects, and deliver reliable, secure, and scalable solutions. Passionate about software development, critical thinking, and continuous learning.

### EDUCATION

#### INFORMATICS ENGINEERING

Latakia University, 2025 – Present

### CERTIFICATIONS

- Multiple Coursera Certificates (Software, Programming, Development)
- English Certificates: 2B, 3A, Upper Intermediate Grammar (RLC)
- C1 English Level (Oxford Online Placement Test)
- Participation Certificates: KPM Finals, Mathematical Modeling Exhibition
- Certificate of Appreciation for Teaching Competitive Programming

### TECHNICAL SKILLS

**Languages & Core:** HTML, CSS, JavaScript, TypeScript, Python, C++, JSON, SQL

**Frontend:** React, Tailwind CSS, Axios

**Backend:** Node.js, Express, Flask, JWT Authentication

**Databases:** MongoDB, SQLite

**DevOps & Tools:** Git, GitHub, Docker, Vercel, VS Code, Visual Studio

**Hosting & Deployment:** Vercel, GitHub Pages, Custom Hosting

### PROJECTS

**Quizland – Educational Platform:** Sole developer and designer of a full educational platform used by ~150 students and teachers. Built courses, lessons, MCQ quizzes, and a full admin dashboard using Flask. Ensured backend security and data integrity. Managed deployment, maintenance, and continuous updates. First real client project, fully functional and actively used.

**My Stickies – E-commerce Website:** Designed and developed a complete e-commerce system for my small business. Built product pages, cart, order system, admin panel, and manual checkout flow. Backend: Node.js, Express, MongoDB, JWT, WhatsApp automation, email system. Frontend: React, Tailwind, multilingual support. Replaced manual workflows and is under active development.
